Education

National Chung Cheng University (CCU) , Mechanical Engineering	Chiayi, Taiwan
• Full Scholarship recipient • Department of Mechanical Engineering; program begins 1 September 2026	Sept 2026 – 2028
King Mongkut's University of Technology Thonburi (KMUTT) , Automation Engineering	Bangkok, Thailand
• First Class Honors • Thesis: Natural Gas Methane Leak Detection Using an Infrared Camera • INC Department Outstanding Student Scholarship • Winter Semester 2023 & 2024	2022 – 2025
Yangon Technological University (Center of Excellence) , Mechatronics Engineering	Yangon, Myanmar
• Participated in Myanmar RoboLeague 2019 as Mentor • Led First Global Challenge 2019 team representing Myanmar	2015 – 2022

Experience

Maintenance Technology Center (MTC) - Non-Destructive Detection Technology Lab , Full Time Machine Learning Researcher	Bangkok, Thailand
Developed advanced machine learning solutions for non-destructive testing applications under Prof. Cherdpong Jomdecha, focusing on acoustic emission sensor data analysis and anomaly detection.	Sept 2025 – May 2026
• Designed and built efficient data pipelines and workflows using Python and improved data processing efficiency, scalability, and reliability by optimizing pipeline workflow, resulting in faster model training and deployment • Implemented unsupervised clustering and anomaly detection algorithms for pattern recognition in complex time-series sensor data from industrial pipe inspection systems • Contributed to innovative maintenance technology solutions for industrial applications, including a Q1 (Web of Science) journal publication on motion-induced eddy current testing for railway defects	9 months
Maintenance Technology Center (MTC) - Non-Destructive Detection Technology Lab , Machine Learning Intern	Bangkok, Thailand
Independently designed and implemented unsupervised machine learning solutions for GRP pipe inspection using acoustic emission sensor data, demonstrating strong problem-solving and analytical skills in identifying patterns from complex, real-world infrastructure data on Linux based WSL2 platform with version control via Git.	June 2025 – Aug 2025
• Won First Runner-Up Award in 'Smart Infrastructure for Smart City' competition by Metropolitan Waterworks Authority • Listed in KMUTT Hall of Fame for outstanding achievement in Smart Infrastructure development • Applied AI/ML techniques to solve real-world infrastructure challenges	3 months

HoneyHunt.AI, Junior Machine Learning Intern / Large Language Model Intern
Enhanced automated resume parsing and intelligent job matching systems by integrating AI APIs (advanced LLM APIs), improving accuracy and scalability.

- Improved algorithm scalability and matching accuracy for production-level deployment
- Contributed to product development in AI-powered recruitment technology
- Explored Generative AI techniques to design agentic workflows for automated data processing and decision-making, leveraging LLMs and prompt engineering to optimize AI-driven recruitment solutions
- Implemented API management best practices including versioning, rate limiting, and authentication using API gateways to support reliable deployment of GenAI workflows in production environments

Bangkok, Thailand
Dec 2024 – Feb 2025
3 months

Research

KMUTT - OPTIMISED 3D-CNN FOR REALTIME INFRARED NATURAL GAS LEAK CLASSIFICATION, Computer Vision (Student) Researcher
Developed optimized 3D CNN architecture for real-time infrared video classification achieving 99.75% accuracy in methane gas leak detection, processing temporal-spatial features from thermal camera streams.

- Implemented classical image processing preprocessing pipeline including Gaussian Mixture Models (GMM), Running Average, and adaptive background subtraction for robust foreground segmentation in varying lighting conditions
- Optimized model for edge deployment through input resolution scaling (half/quarter size variants) and quantization techniques, maintaining 99%+ accuracy while reducing inference time by 60%
- Co-Winner of Best Paper Award at 13th International Conference on Information and Communication Technology Bandung (Hybrid)
 - IcoICT 2025

Bangkok, Thailand
June 2024 – Sept 2025

CODIA Lab, KMUTT & Panasonic Singapore, Perception (Student) Research Engineer
Developed and optimized SLAM Sparse Bundle Adjustment algorithms in C for visual odometry applications for real-time edge deployment on ARM-based embedded platforms.

- Optimized SLAM Sparse Bundle Adjustment algorithms for edge devices, improving computational efficiency and enabling real-time performance in resource-constrained environments

Bangkok, Thailand
Feb 2024 – July 2024

COSIN Lab, INC Department, Student Researcher
Developed ROS2-based autonomous navigation systems integrating IMU and camera sensor fusion for competitive robotics applications.

- Implemented micro-ROS framework on microcontrollers for real-time IMU data acquisition and sensor synchronization, achieving sub-10ms latency for control loop feedback
- Performed sensor calibration including IMU bias estimation and camera extrinsic alignment to improve localization accuracy in dynamic environments

Bangkok, Thailand
Feb 2024 – July 2024

Volunteer

FIRST GLOBAL CHALLENGE 2019, Mentor
Provided technical guidance and strategic mentorship to Myanmar national robotics team, fostering knowledge sharing through structured training sessions and collaborative problem-solving.

- Led team to win Judges Award at international robotics competition
- Fostered STEM education and international collaboration in robotics

Dubai, UAE
June 2019 – Oct 2019

Laboratory of Robotics and Artificial Intelligence (L.O.R.A), Robotics Researcher and Founder

Yangon, Myanmar
Dec 2019 – June 2021

Founded and led comprehensive robotics research laboratory focusing on practical applications.

- Spearheaded development of autonomous disinfection robots during COVID-19 pandemic in Myanmar
- Managed multiple concurrent research initiatives and mentored junior researchers
- Managed cross-functional communication between engineering teams, public health stakeholders, and external partners to align technical development with societal needs during the pandemic

ConceptX International School, Head of Department and Instructor of Robotics and Computer Science

Yangon, Myanmar
June 2021 – Dec 2021

Instructed Computer Science and Robotics to approximately 200 students from Upper Primary 5 to Lower Secondary 2.

- Promoted to Head of Department in October 2021
- Taught IGCSE Computer Science to Secondary 3 students

Awards

Best Paper Award - IcoICT 2025 (IEEE Xplore)

July 2025

Co-winner with Asst. Prof. Dr. Sarawan Wongs

13th International Conference on Information and Communication Technology, Bandung

Best Presentation Award - ICA-SP Con 2025

Apr 2025

16th Instrumentation, Control and Automation Senior Project Conference

First Runner-Up - Smart Infrastructure for Smart City Competition

July 2025

Metropolitan Waterworks Authority, Bangkok

KMUTT Hall of Fame

July 2025

King Mongkut's University of Technology Thonburi

INC Department Outstanding Student Scholarship

2024

KMUTT - Control System and Instrumentation Department

INC Department Outstanding Student Scholarship

2023

KMUTT - Control System and Instrumentation Department

Judges Award - First Global Challenge 2019

Oct 2019

International Robotics Competition, Dubai, UAE

first.global/2019-nations/myanmar-2019

Publications

Development of high-speed inspection technique based on motion-induced eddy current testing for surface railway defects

Q1-ranked journal (Web of Science) publication on a high-speed motion-induced eddy current testing (MIECT) technique for detecting surface railway defects, developed with the Maintenance Technology Center (MTC), KMUTT. DOI - 10.1080/10589759.2026.2638558
